

EMBRAER PHENOM 300

The Phenom 300 is an award winning super-light jet with best-in-class climb, speed and performance. The spacious cabin is the largest in it's class with expanded head and leg room and large windows. It performs well at challenging airports with high elevations and hot temperatures, and is equipped with amenities including high-speed WiFi, CD/DVD/ XM radio, iPhone ports and more.

There is seating for six to nine passengers including six captain's chairs in the main cabin, a side-facing divan able to seat two forward, and an aft lav with a solid pocket door. The luxurious interior was designed by BMW and features leather chairs that recline and move. The baggage capacity of the Phenom 300 is also the most spacious in its class at 84 cubic feet total.
