- Executive Writing Tables
- Ample Baggage Capacity

PILATUS PC-12

The Pilatus PC-12 has gained a reputation for outstanding versatility, performance, reliability and operational flexibility. As such, it is one of the most popular turbine-powered business aircraft on the market today.

To accentuate your comfort and productivity the PC-12 features a cabin bigger than most small jets and is comparable to many medium sized jets, a flat floor (unlike many with a dropped center aisle), and a fully enclosed flushing lavatory and a baggage area that you can access in flight. It provides two crew seats and six executive chairs with fitted cabinets and tables. The executive chairs can be arranged for private relaxation or for work with conference-style seating.

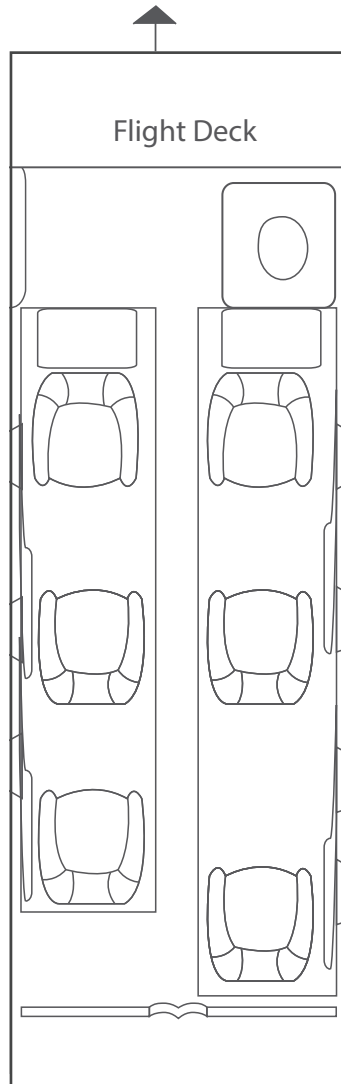

The Pilatus PC12 represents a great combination of capacity, amenity, speed, range and performance.
